Built-In Accessibility Across Print, Digital, and Hands-On Learning

- Differentiated teacher lesson plans
- Print-based materials, worksheets, visual supports
- Responsive technology lessons, teacher-led and student-led
- TeachTown Benchmark Assessments in 3 formats
- Adapted library books available in 3 levels, print and digital
- Robust manipulatives for hands-on learning

Accessible Technology That Adapts to Student Needs

- Scanning technology to support switch access
- e-Readers & text-to-speech
- Closed captions for teacher-led tech lessons and *Social Skills and Transition to Adulthood* videos
- Customizable settings: session length; frequency and type of positive reinforcements

Build Your Confidence with Assistive Technology

On-Demand Training for ALL TeachTown Users

Supporting students with disabilities means providing access that works for every learner. TeachTown offers a complete, self-paced Assistive Technology (AT) Learning Path, designed to help educators understand, implement, and adapt AT tools in their classrooms with confidence.

What You'll Learn

What assistive technology is and how it supports learning

Differences between AT for communication vs. access

Common low-tech and high-tech AT tools

How AT can improve communication, independence, and quality of life

How to integrate AT into TeachTown solutions

Real-world strategies for adapting hands-on and digital materials

This asynchronous course is available to all TeachTown users and is part of our commitment to making learning accessible for all.
